## National Occupational Exposure Survey (1981 - 1983)

## Estimated Numbers of Employees Potentially Exposed to Specific Agents by Occupation\*

Agent Name

SILICIC ACID, SODIUM SALT, HYDROLYSIS PRODUCTS WITH

CHLOROTRIMETHYLSILANE AND

DICHLOROETHENYLMETHYLSILANE

CAS#

68584-83-8

RTECS#

Agent Code

E0743

		Total # Employees	Total # Female
Code	Occupation Description (1980)	(Male & Female)

<sup>\*(1)</sup> The estimates for each occupation apply across the surveyed industries in which the agent was observed. Not all industries were surveyed, and not all agents were observed in all surveyed industries. (2) When using the estimates, standard errors associated with estimates should be considered. (3) Potential exposures to a chemical agent are categorized as actual (i.e., the surveyor observed the use of the specific agent) or tradename (i.e., the surveyor observed the use of a tradename product known to contain the specific agent). The estimates presented in the table combine both categories.
